

TRENDLINE ARTBOX

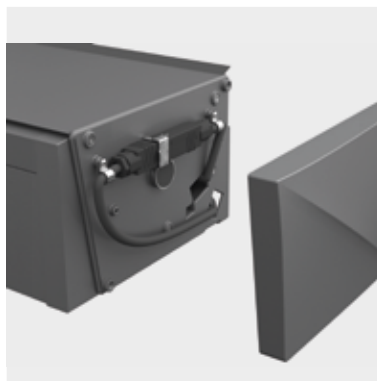

NEW PRODUCTS

DESIGN MEETS TECHNOLOGY

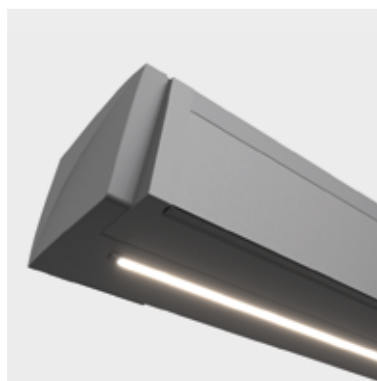

DESIGN & FUNCTION

The clever design, with a minimal gap between awning system and wall that features an additional protective seal to prevent water egress during driving rain, allows for installation that gives a smooth, virtually flush finish. Thanks to concealed brackets and power connection fully integrated into the cassette, the Artbox also impresses with its compact overall design.

LED LIGHTING

The LED light bar allows for continuous lighting of up to 7 metres, and can be conveniently operated using the awning's hand-held remote control unit. In addition, both power supply unit and remote control dimmer for the LED light bar are integrated into the cassette, and therefore invisible.

VARIOVOLANT VARIOMOTION

The variovolant for the Artbox is directly integrated into the drop profile. The ballast profile retracts fully, making it flush with the drop profile. The variovolant can be supplied in a system width of up to 6 metres, enabling you to enjoy shade and privacy even when the sun is low. Choose between crank or motor drive to operate the variovolant.

System width
up to
7 m

Compact slimline design and sophisticated technology: the new TRENDLINE ARTBOX from **WOUNDWO** is the new, universal cassette awning for patios, balconies and loggias. The perfect finishing touch for contemporary minimalist architecture. The TRENDLINE ARTBOX is available with an optional additional Vario valance that is directly integrated in the profile and can be used with projections of up to 3.5 metres (with Vario valance up to 3 metres) and awning widths of up to 7 metres (with Vario valance up to 6 metres).

THE BENEFITS TO YOU

- 5-year guarantee
- The awning fabric and arms retract fully into the cassette
- Wall or ceiling mounting
- Mounting profile for flexible installation
- Flush installation on the wall
- concealed brackets
